**QUANTRO Therapeutics** is a visionary and dynamic Vienna-based start-up company that strives to establish a novel class of effective therapeutics interfering with disease-causing transcriptional programs in cancer and other diseases. At our R&D labs and company headquarter at the Vienna BioCenter Campus we currently have an opening for the

## HEAD OF BIOLOGY (F/M/D)

The position can be filled **immediately** and comprises of the following **tasks and responsibilities**:

- Leading and developing QUANTRO's drug discovery program with respect to molecular biology, genetic and pharmacological research
- Planning, conducting and supervising, analyzing and visualizing molecular biological experiments (BSL-2) in the field of genetic engineering and transcriptomics
- Spear-heading the development, optimization, and implementation of innovative research technologies in cellular high-throughput screens for hit identification and compound characterization
- Leading, directing and motivating a team of academic and technical laboratory staff in QUANTRO's biology research group
- Leading and supervising collaborations with CROs and partners
- Defining the scope and preparing the respective documentation for scientific documentation used in interaction with investors, as well as regulatory and funding agencies
- Take responsibility in legally required roles (e.g. biosafety officer, employer worker safety responsibility, or similar as applicable)

The ideal candidate should contribute the following **qualifications and experiences**:

- PhD in the fields of molecular biology, biochemistry, biotechnology or pharmacology
- Track record of pertinent publications in highly ranked journals with demonstrated ability to convey complex scientific content orally and in writing
- Strong drive for research innovation and discovery with interests and a clear track record in the development and application of cutting-edge research technologies
- Prior experience in drug discovery projects will be considered as an advantage
- Practical experience as independent project leader or supervisor (e.g. as PI or senior postdoc)
- Excellent communication skills with full command of English and good knowledge of German
- Flexibility and agility to address the fast moving and changing needs of a start-up business
- Open-minded team-player, willing to take up tasks also outside own job area when needed
- Ability to multi-task and resilient personality
- Willingness to contribute with a creative mindset to a friendly and productive work environment

QUANTRO Therapeutics offers cutting edge R&D in the areas of applied molecular biology, functional-genetics and transcriptomics. We are a diverse and dynamic team working with an international background and in collaboration with outstanding and globally recognized scientific experts to transform therapeutic approaches in oncology and other diseases.

The minimum monthly salary (posted according to Austrian legal requirements) for this position amounts to EUR 5,000 gross based on fulltime (40 hours) per week, 14 times per year. Depending on relevant job experience and qualifications the remuneration can be negotiated. QUANTRO offers a competitive salary, personal development opportunities, and flexible working time arrangements.

If you think that you are a perfect match for the profile we are looking for and are interested to work in an inspiring and visionary start-up environment, we are excited to receive your application and are looking forward to making your acquaintance. Please send us your comprehensive application file including a detailed CV and a short note why you would be eager to join QUANTRO Therapeutics and let us also know your date of earliest availability and salary expectations.

For upfront questions, more information, or to direct your written application please contact Dr. Dieter Nachtigall, CEO of QUANTRO Therapeutics: [dieter.nachtigall@quantro-tx.com](mailto:dieter.nachtigall@quantro-tx.com), +43 664 9158111.
